

SPECTRUM GAMING

in partnership
with:

A community created by autistic adults, for autistic young people ages 10-17 who live in Waltham Forest

Spectrum Gaming is an autistic-led UK based charity that supports autistic young people. We aim to create a world where every autistic child knows that who they are is ok and they can be themselves, whilst still developing meaningful relationships and achieving their personal goals.

We do this by providing spaces where they feel safe and accepted, amongst others with similar shared lived experiences, and opportunities to explore who they are. As well as our community provision, we are also involved in a wide range of advocacy work, which you can read more about on our website.

A summary of what we offer young people:

- Access to the Spectrum Gaming Minecraft server, which is open 10am-10pm every day.
- Regular online events around young people's interests, both gaming and non-gaming events.
- Open access to our online community on Discord, open 10am-10pm every day. This is an accessible space to connect with other young people through text, voice chats, video calls and gaming. The servers also have local area chat spaces too.
- Access to events and information around autistic understanding and wellbeing.
- Lots of joy, laughter and connection.

"I have had proper friends and a community for the first time in my life."

How to join:

- 1) Submit an application form on our website.
- 2) Arrange verification of your young person's identity, either via a video call with us, or an email from a professional who knows them.
- 3) Once verified, further instructions on how to join our servers will be emailed out to you.

Further information on who we are, what we do, and how the community works is available on our website!
